CyberLitmus

21 March 2022

To Whom It May Concern

I had the pleasure of working with Rohan during his internship with CyberLitmus as a Web Development Intern, over the period of 13 Dec 2021 till 18 Mar 2021. Our core product is a phishing simulation platform, which helps users create realistic phishing emails and landing pages, so that they can assess their company's cybersecurity posture. As such, Rohan was heavily involved in creating such realistic looking HTML emails and web pages, based on their real-world equivalents, to simulate real-world phishing attacks.

During the 3 months that Rohan spent with us, he has demonstrated great willingness to step outside of his comfort zone, utilizing his skills in writing custom HTML, CSS and JavaScript. Even more impressively, he took on the challenge of learning completely new frameworks and languages - specifically, Angular and TypeScript.

Rohan is clearly an energetic and passionate person, who not just has a sense of curiosity and willingness to learn, but is also a quick learner. He acquired the new technical skills that the tasks demanded, quickly and independently.

As a member of the engineering team at CyberLitmus, Rohan continually proved himself to be most valuable - not just in doing the tasks that needed doing, but also going ahead to design, propose and pitch improvements to both existing features, as well as new features. Rohan puts in effort into every piece of work that he does and ensures that the work that he does is done to the best of his ability.

In all, what was most impressive about Rohan is that he truly puts in his best effort into every piece of work, regardless of whether the work is challenging or mundane. I am personally impressed that despite his young age, Rohan managed to go toe-to-toe with his much more senior colleagues, and truly made himself their peer. He demonstrated initiative, maturity and independence, and an all around positive attitude. His determination, resilience, and communication skills make him a joy to work with.

Finally, Rohan works well with his peers, and is more than happy to share and assist, when the situation calls for it. Rohan was an incredible addition to our team during the time he spent with us. With his great attitude to learning, I would wholeheartedly say that he would certainly be a wonderful contributor wherever he is, and I believe he will excel in any field he chooses to be in, as long as he is given the opportunity.

Sincerely,

Eugene Ching
CTO
